

KOMODO LINEAR FIRE PIT

Komodo is the natural evolution of our linear fire pit range. Longer and taller than our other offerings, this contemporary fire pit offers new and dynamic placement possibilities: as a dramatic divider to define social spaces; as a grand central feature of a landscape plan, or as multiples aligned to create a spectacular wall of fire. Equally at home in a residential backyard, a hotel garden, or a restaurant patio, Komodo is a contemporary fire pit designed for maximum visual impact.

Komodo is available in two lengths: seven foot | 2134 mm and five foot | 1524 mm and is powered by 72" and 48" (1829 mm and 1219 mm) burners respectively. At 110,000 and 80,000 BTU/h (40 and 27 kW), there is no shortage of heat. Komodo Contemporary Fire Pit comes complete with a choice of topping medium and a commercial-grade all-season cover. It is available in powder-coated steel in three colours, as well as Corten weathering steel.
