

MISO MODERN FIRE PIT

Miso is a peaceful modern fire pit with wide, shallow dimensions. A contemporary centrepiece to outdoor rooms and patios of any style, its low stature is reminiscent of a campfire, making it the perfect accompaniment to warm conversations and evening entertaining. Its cast concrete vessel is attractive and functional: weather-resistant, substantial with clean, crisp lines that convey an air of sophistication.

Miso modern fire pit is available in natural gas or propane-fueled versions which provide coziness on cool evenings and a warm, mesmerizing glow that can only come from open flame. There are two burner styles: a manually-lit version with standing pilot and safety thermocouple, or an electronic ignition model that may be controlled with a wall switch or wireless remote; and two sizes: 36" (914 mm) and a more dramatic 48" (1219 mm) diameter version.

All of our modern fire pits come complete with your choice of topping medium, a commercial-grade all-season cover and are available in a selection of architectural concrete colours. Table tops are also available if you want to turn your fire pit into an outdoor coffee table when it is not aflame.

DIMENSIONS & WEIGHT
